

I could not be more excited to be the first to announce our newest product in the Memories Line. This has been a product I have been in love with for years and could not live without. **Memories Resist**: This product is a masking fluid in a bottle with a nib to control the flow. You will be able to protect an image with your Memories Resist while adding more inks, paint, Memories Mists, anything you can imagine. This product is great for Watercolor or Stamper and Scrapbooker alike. It will work on many different services including: Glass, Gourds, Paper, and Acrylic. Let's get down to business and learn how this product works. Hold on to your seat you are about to be blown away.

Never Cut a Paper Mask again: For my stamper friends who now stamp an image twice, then cut out one of those images and place it over the other image to stamp another image on top, you are going to love this...

Directions:

- 1) Stamp "Primitive Heart" from [Stampotique](#) with Palette "Moulin Rouge" on white cardstock.
- 2) Cover image with Memories Resist and set aside to dry. Memories Resist dries clear.

- 3) Clean "Primitive Heart" stamp and re-ink using Palette "Claret". Stamp 2nd image over Masked Heart (see sample for placement). Peel off Memories Resist. Matt stamped Image onto Gold cardstock.

- 4) Adhere matted image to card base

- 5) Stamp: "I thought of you today" (also Stampotique) using Palette "Moulin Rouge".

This is a simple card that you can make in minutes. Amazing how easy it's going to be for us stampers now with this product. Just think, you will never cut a paper mask again. The time you will save.

Facebook: Please become my friend on Facebook (Terri Sproul) and receive notification on all the latest information and more of my projects....
